

Worldwide Laser Announces New Drawer Laser Marking System

The Galvo based Co2 laser marking systems provide for fast easy laser marking of custom logos, identification, or other information that adds value to custom wooden or plastic drawers the system is ideal for custom cabinets as well.

Gilbert, AZ ([PRWeb](#)) June 26, 2008 -- Worldwide Laser Service Corporation is pleased to introduce the new LP8000 Co2 laser marking system for custom wood and plastic drawers and cabinets.

The LP8000 series of Co2 lasers from Worldwide Laser are perfect for marking wooden or plastic drawers and cabinets.

The Galvo based laser marking systems provide for fast easy laser marking of custom logos, identification, or other information that adds value to custom wooden or plastic drawers the system is ideal for custom cabinets as well.

The LP8000 series of Co2 lasers can laser mark complex logos & names into the drawers or cabinets in 20 seconds or less this speed is possible due to the specific design and layout for the Worldwide Laser series of Co2 lasers the LP8000 series and is much faster than any other type of laser systems, the laser controller software is windows based and easy to use, there are three different software packages from which customers can choose depending on the specific needs and requirements, options such as scanning the traveling bar code to select the proper laser marking files, RS232 or serial text input for automatic laser marking of custom messages that can be changed with each laser mark in fractions of a second, or automatic selection of the proper marking file with binary tag identification are available.

Laser Systems from Worldwide Laser can be stand alone stations that are operated with manual loading of the parts for laser marking by an operator, or can be automated with conveyer belts, pick-n-place robotics, etc for high thru-put production demands.

Worldwide Laser is the leader in the manufacture of fast long lasting reliable laser marking systems for custom drawers and custom cabinet manufacturers.

Call the laser experts at Worldwide Laser let us build a drawer marking system for your operations.
